Standard Operating Procedures

Slow and Advanced Learners

General:

Every student gets equal opportunities to education at all learning levels at MGM's College of Computer Science & IT, Nanded. Teachers deal with a variety of student types in the classroom: some are highly intelligent and pick things up quickly, while others are weak and pick things up more slowly. Determining each student's abilities in the class is therefore necessary. Some students merely require advice, while others require hard work and consistent attention, depending on their assessed abilities. On the basis of their learning speed students are categorized in two groups; Slow / Advanced learners.

Process of identification of slow and fast learners

The institution employs a rigorous process to distinguish between advanced and

slow learners. Identification criteria of slow learners

- Students who are week in prerequisite for a course.
- Students whose performance is below expectation level during the classroom sessions
- Students securing less than 40 % of marks in test assessment are considered as slow learners.
- Feedback from Subject in charges and class in charges.
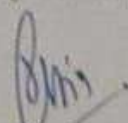

Identification criteria of fast learners

- Students who are having a sound knowledge in prerequisite for a course.
- Students whose performance is up to expectation level during the classroom sessions
- Students securing more than 60 % of marks in class assessment are considered as fast learners.

Strategies for assisting slow learners

- Compensatory lectures to improve/ revise prerequisite for a course.
- Conducting Remedial lectures / doubt clearing lectures.
- Promoting slow learners to enrol Online courses through Springboard, NPTEL and YouTube.
- Asking Questions during classroom session and elaborate related answers.
- Conducting Viva in each practical sessions.
- Encouraging them to spend more time in department/ central library
- Simplified study materials, question banks, Previous Year Question papers.
